

Proposed Residential Apartment at Kokapet

This is a Stilt+5 Storey Luxury Residential building with total built up area 2050 sqm located in a prime area Kokapet.

SIE scope includes providing Structural Design, Drawing and construction advice.

- Left portion of the building has an additional cellar space below the stilt floor. As it is below GL, 300Thk RCC wall is designed throughout the periphery.
- Columns are designed for 300mm wide upto 1st Floor, and is then reduced to 230mm to provide adequate lateral load resistance for soft storey at Stilt level.
- Beam size varying from 230mmx450 to 600mm deep
