Mezzanine floor in existing PEB Structure

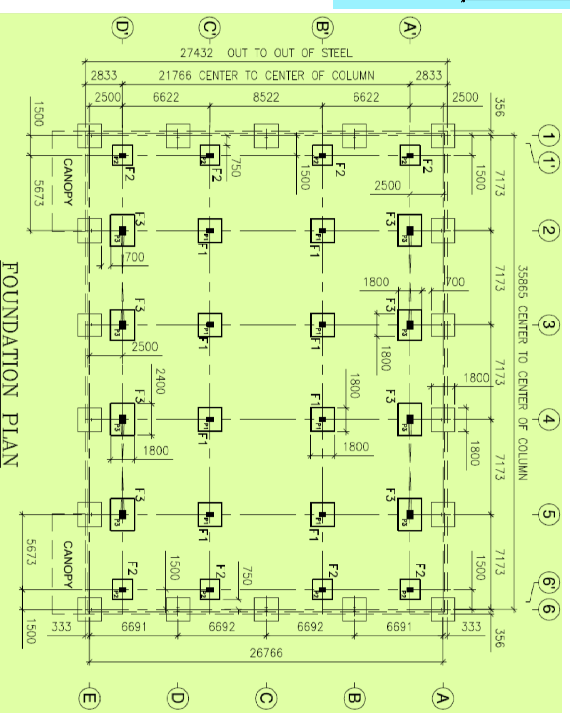

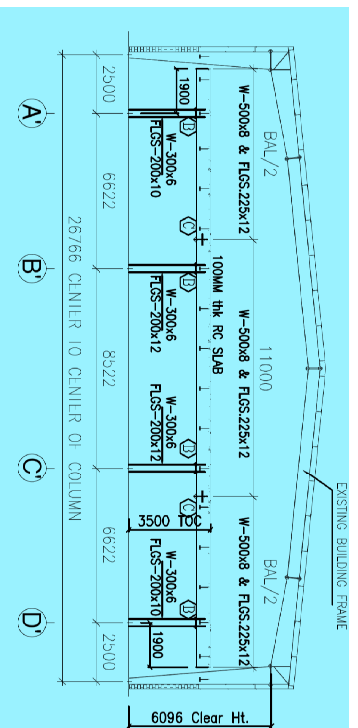

Client requires a Mezzanine Floor inside their factor to utilise for office and storage purpose.

SLE scope includes locating and design of columns/ foundations to support Mezzanine deck of 36m x 27m in plan.

Existing Factory Structural drawings and its Foundations is studied and New Foundations are located such that they won't clash each other in the load transfer.

Foundations and Pedestals design is carried out duly coordinating with Steel Fabricator and their designs.
