Chiripal Polyfilms Ltd: Plant Office Facade

SLE scope includes Structural designs for the proposed Infrastructure which includes Plant office facade

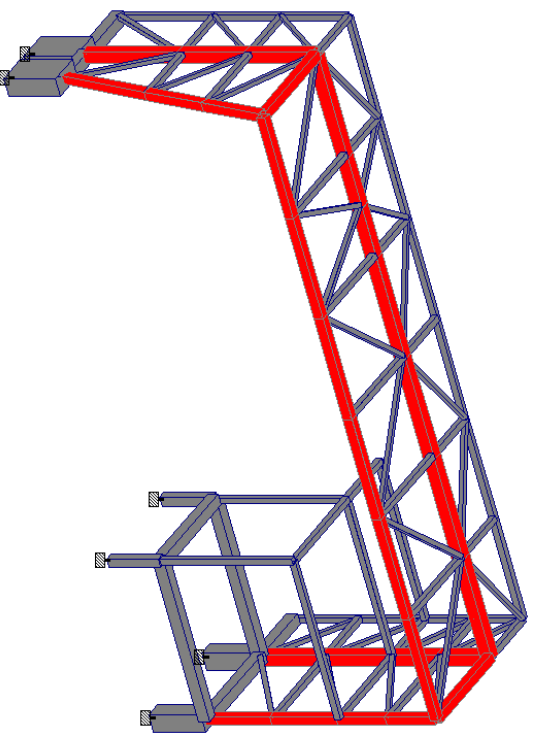

Chiripal Plant office facade is 21m length, 6m width wide and height of 8m provides a grand entry to their Plant office as well gives a shade to reception parking and planter features surrounding.

Plant office built with a standard PEB Steel structure however Façade follows architectural configuration as shown.

Architect chose HPL and Metal cladding as the finish for the facade.

Structural steel members are used to support the above Architectural configuration. These members are designed for gravity loads and environmental loads as per codes standards.
